Seventy-two members of the third class of the Virginia Military Institute were reccently suspended. Guess that will make somebody's hair curl.

Tell us what you drink and we will tell you how you feel.

So live each day that you can have the utmost respect for the thing that looks back at you from your mirror.

We have no faith in the man who has an excess of religion and a dearth of morality.

An estimate from Nathan Bryan as to what Florida's two institutions of learning will need for the next two years, or what the amount of the appropriation to be asked from the next legislature will be, would prove interesting information - Pensacola Journal.

There is a bit of erroneous news effect that Chicago University no longer recognizes the equality of woman. It is still co-educational,

The alumni of the University of this would sound if it were the alumni of the University of Florida. We do not blame a man for being loyal to his alma mater, but it is Florida, now, first, last, and all the time. Pensacola Journal

That's right, brother. Talk it right straight from the shoulder. It pleases us highly to see the press interested in our welfare. Mr. Bryan has paid us several visits this session and is will aware of our needs. In making his recommendation for an appropriation we feel quite certain that he will not forget how much we need an administration building and gymnasium. The administration building now being used was originally intended for a dormitory, and can easily be converted into such when our administration building erected.

The legislature should have no objection to this appropriation. When the Buckman Bill passed this institution was merly established and enough funds provided for for its maintainance for two years. Now it is the duty of the legislature to provide the buildings and equipment that would prove the paternal pride and reflect the loving generosity of a great Southern commonwealth. The U. S. government gives thousands of dollars each year to maintain this institution. The State, at least, should provide the buildings, and remember that the best thing to spend money for is education, and that the most expensive thing is disgraceful ignor-

#### Why Am I Going to College?

First-Because a college educa tion will fit me for a business life Some have supposed that a college education is not needed by one expecting to enter business, but carefully prepared statistics prove the contrary. A thorough mental training puts one on a higher plane at the start and gives him increased momentum through life. James Gordon Bennett, A. T. Stewart, Abram Hewitt, Theodore Roose velt, the younger Astors and Vanderbilts, and hundreds of others who have taken the highest places as business men and money getters were graduates of such colleges as Yale, Harvard, Columbia and

True, you may name many sucand fifty non-college men.

cation will fit me for social life. more useful member of society.

college training.

come the child again. The subject of public interest. Our ignorant plowman returns weary faculty is O. K. and dull from his day in the field; the botanist or geologist returns from the same field with equal going the rounds of the press to the physical weariness, but with his mind enlarged and his soul enriched with many visions of beauty which have come to him during and the University of Pennsylvania the day. Years of self-denial and now admits men and women on the downright hard work will be necsame conditions. Why shouldn't cessary to accomplish my purpose, the University of Florida take the but I am sure the product will be next step in advance? All the well worth its cost. Long years Colleges in the State with which may be spent in grinding and it must compete are co-educational, polishing the lense of a great teleand such a movement would un scope, but if by means of it one questionaly increase the attendance new star is discovered the cost is many times repaid.

Ideas are worth more than stars and these shall be the objects of the South will soon organize in my pursuit. The chief advantage Jacksonville. Hsw much better of culture is not that it enables one to amass wealth, not that it enables one to reach high position in society and professional life, but in the duty of every patriotic Flori- the enlargement and enrichment of dian to work for the University of his natural endowment, and in the ability which it gives one to make the most of his life.

In order that I may achieve wealth the more readily, if I wish it, or that I may secure social recognition-that I may be able the more fully to serve God and my fellow men-that I may possess an intellectual personality: For these reasons I am determined to secure a college education.

#### Baseball.

The regular routine of practice has begun for the baseball squad and the athletic field is a busy scene every afternoon. A great element of Stetson's baseball success in the past few years has been the systematic training given the players. The old haphazard method has been done away, and now the men are divided into squads according to the positions for which they are trying. The scene every afternoon is that of one squad on infield; another outfield squad catching flies; the pitchers working out the equations of their curves; and every one taking his turn before the batting net.

Opposing teams have been lined up several times for short games, but no fast work was done owing to the fact that the pitchers are not yet in condition. However, the early season soreness is wearing off and throwing arms wil soon be in shape. Indications are that Capt. Campbell will have his team in good condition for the first game early in February-Stetson Collegiate.

#### Stetson Ball Team.

The baseball season is herethe season when the fan dreams of ten inning games; the player of Ormoud Hotel "eating" and home runs; and the reporter sweats over new sporting adjec-

At a meeting held in room five Friday, the 4th, Capt. "Speck" Campbell called the squad out for the first practice on Monday after-

"Every place on the team is open to the best man," said Capt, Campbelll, and it is evident that there will be some hard work done to secure positions. Six of the ,06 nine are still in the University who will endeavor to hold their places on the team, while the sub of last year and men newly regis tered will strive for an "S" this

The prospects for a strong team this spring are very bright. Ed-Mickle and Pelot, who have divided the honors of the box for two seasons, are in the pitcher's squad again and to them are to be added Hunter, who is registered from Charlotte, N. C., and who has reputation for strong pitching, and Robinson, who is expected to develope into a new "wizard of the slab" before the end of the season.

The other "S" men in the University held the following positions last year: Capt. "Spotty" behind the bat, Hamlin 1st base, Kirby 2nd base, and Tilden center field Other new men who have had previous experience are Gautier, an outfielder, Pete Allen, who has played second, and Parsons, who will try for short. Russel King who has had experience both as a pitcher and an infielder.

In addition to these about twen ty-five other aspirants for fame reported Monday afternoon and were assigned to the try out squads.

Mr. Tilden, manager of the team, has been working hard to secure a desirable schedule and indications are that the coming baseball season will be full of interest and enthusiasm. The team will probably take two long trips, one to Miami and the other to Georgia. In addition to this, Ormond, the K. M. I. and the Florida colleges will doubtless be given games and the season will be filled out with games between Stetson and city teams.

Capt. Campbell in addressing the baseball meeting Friday after- V. P. HARMELING noon said, "I'm going to have a batting team. The team that hits the ball is the one that makes the scores. We have much better material than in former years. Mr. Pelot has coached raw material into a winning team and I'm sure that with the men Stetson has this year the season will be a successful one."
